

E-STOP FIXING

The Fixing plate for the emergency stop unit is designed to fit directly onto the belt conveyor fixings and the hole pattern on the bracket is designed to fit version ZB0071 72 73.

The plate can be mounted onto any of the fixing variants, on the end fixing as well as on a straight bracket in the middle of a row.

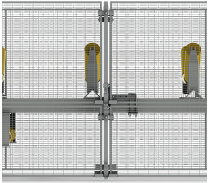

The E-Stop Fixing plate is hot dip galvanized, providing good corrosion protection suitable for very harsh environments.
